It currently consists of 4 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     120991: contig of 120991 bp in length 121091: gap of 100 bp 132589: contig of 11498 bp in length 132689: gap of 100 bp 153921: contig of 21232 bp in length 154021: gap of 100 bp 185309: contig of 31309 bp in length.

And the sequence is submitted by the collaborative project between (Computational Biology Research Center (CBRC), National Institute of Advanced Industrial Science and Technology (AIST) and [Genome Science Division, Research Center for Advanced Science and Technology (RCAST), University of Tokyo].
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Grenterrecressearcesagererssaacaarrearristseererearecer 320

It currently consists of 19 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
